Professional Experience

- System Analyst & ERP Project Specialist**, *Atiker Yazılım* 07/2026 – Present
- spearheading the end-to-end setup, customization, and deployment of ERP and B2B SaaS solutions for large scale manufacturing clients.
 - conducting on-site field analysis at factory floors to translate complex operational bottlenecks (BOM management, inventory tracking) into actionable database modules and software features.
 - optimizing legacy business logic within extensive MS SQL Server environments through advanced stored procedures, triggers, and performance tuning techniques.
 - acting as a technical liaison between clients and the internal development team, leveraging modern software architecture expertise to propose long term product improvements.
- Software Developer**, *Insider One* 08/2025 – 01/2026
- developed algorithms and provided technical solutions for user segmentation, web services, and growth management projects serving global clients
 - delivered advanced front-end features using JavaScript, jQuery, HTML, and CSS, implementing component design and accessibility standards
 - optimized application performance and code efficiency, significantly improving maintainability across team projects
- Software Engineer Intern**, *Wisersense Information Technologies* 07/2024 – 08/2024
Ankara, Turkey
- worked on Linux systems to build and deploy IoT projects

Education

- B.S. Information Systems and Technologies (CTIS)**, *Bilkent University* 09/2022 – 06/2026
Comprehensive Scholarship Ankara, Turkey
- B.S. Business Information Technology**, *Haaga-Helia University* 01/2025 – 05/2025
Exchange Semester Helsinki, Finland

Projects

- NAZİK**, *HR & Personnel Management Platform (PDKS) | Next.js, TypeScript, Tailwind CSS, PostgreSQL*
- architected a full-stack HR management platform for employee tracking and attendance using Next.js App Router and Supabase
 - implemented an enterprise-grade Role-Based Access Control (RBAC) system to secure administrative dashboards and complex CRUD operations for personnel data
 - utilized Next.js Server Actions and configured Edge Middleware to manage localized routing (i18n) and globally authenticated user sessions
